The Hormuz Report ✓

@HormuzReport

BREAKING: The U.S. and Israel prepared the largest bombing campaign against Iran, targeting nuclear facilities, power plants, refineries, and other critical energy infrastructure, with officials discussed to end the offensive before financial markets open Monday to limit economic fallout, according to CBS News and CNN.

The targets extend beyond Iran's military to the backbone of its economy. Tehran has already warned it has prepared a comprehensive plan to strike critical energy infrastructure across the Middle East if attacked, risking a severe global energy shock.

This performative attack would do nothing but kill more innocents and impoverish hundreds of millions of people across the globe, including Americans -- all b/c DJT is too much of a coward to admit that he's lost the war and made a horrible decision to start it in the 1st place
